

# 170 POUND AUTOMATIC HAMMER

When the Texas DOT requires testing with a 170 lb hammer, your CME 140 lb Automatic SPT Hammer System can be easily converted. The 170 lb conversion consists of an extended top cap for the hammer barrel, 170 lb hammer weight, and longer hammer anvil to create the 24" drop required for Texas Cone Penetrometer tests. Simply remove the standard 140 lb hammer barrel top plate, remove the 140 lb hammer weight, drop in the 170 lb weight and install the new extended top cap. *Note in some cases machines may require modification to the drill mast leg to create clearance for the extended cap. Please contact our service department for further details.*

CME offers other hammer systems as well including 300 lb and 340 lb systems.
