

CME PORTABLE JACK PAD

The CME Portable Jack Pads are engineered to bend but not break and are backed with a lifetime warranty. The thermoplastic material is lightweight and has a strength capacity of 100,000 lbs., bending capacity of 45,000 lbs. and a crush rating of 200 psi. The pads have a safety orange handle that, unlike rope handles, is unbreakable, comfortable, and completely waterproof in addition to being UV, hydraulic fluid and road chemical resistant.

You will never make plywood pads again!

Safety textured, no splinters, no warping, no delamination. Recovery memory after bending. Drop them, drag them, submerge them in water, use them in freezing temperatures or searing heat.

*CME part #220400 -18" square x 1" thick.
Other sizes available upon request.*
