

S-SERIES HOLLOW AUGER HEAD

Central Mine Equipment Company offers the **patented S-Series cutter head for hollow stem auger drilling applications**, which features replaceable shields for the bit pockets. After normal wear, the inexpensive shields can be replaced before wear damage occurs to the bit pockets themselves. This system can increase cutter head life substantially.

Another benefit of these S-series cutter heads is their inter-changeable teeth. Depending on the material being drilled, conical, spade, or 5S teeth can be used in any combination. This versatility also allows teeth to be changed as the formation changes. That means the best penetration rates and longer tooth life.

Keep a smaller inventory of cutter heads since the S-series heads can be rebuilt in the field. And starting a hole with a head that's questionable, (which could mean big trouble if it fails downhole) is no longer a temptation. Worn shields and teeth can be replaced at any time to ensure problem free penetration. All of this means substantial savings in annual tooling costs and better drilling efficiency.

S-Series Hollow Auger Head

S-Series Hollow Auger Heads			
Size	Pockets	STD	HD
2.25"	4	12734	N/A
3.25"	4	12766	12693
3.75"	4	12769	12671
4.25"	4	12779	12669
4.25"	6	12755	12715
6.25"	8	12760	12682
8.25"	10	N/A	12700
10.25"	12	N/A	12726

* Teeth and Shields sold separately

S-Series Head Components	
Part No.	Description
12744	Conical Tooth
19396	Large Conical Tooth
19394	Large Conical Bit Skirt
12759	5S Tooth
19390	Spade Tooth
19373	Hard Surfaced Shield
19381	Carbide Tipped Shield
12747	Bit Retainer

4.25" 6-Pocket Heavy Duty S-Series Hollow Auger Head
 shown with
 (6) Hard Surfaced Shields
 (6) Bit Retainers
 (2) Large Conical Teeth with Bit Skirts
 (2) 5S Teeth
 (2) Spade Teeth

3.25" 4-Pocket Standard S-Series Hollow Auger Head
 shown with
 (4) Hard Surfaced Shields
 (4) Bit Retainers
 (4) Conical Teeth
